Gateway

Last Modified on 02/02/2024 2:07 pm CST

This is your Integrated Gateway system.
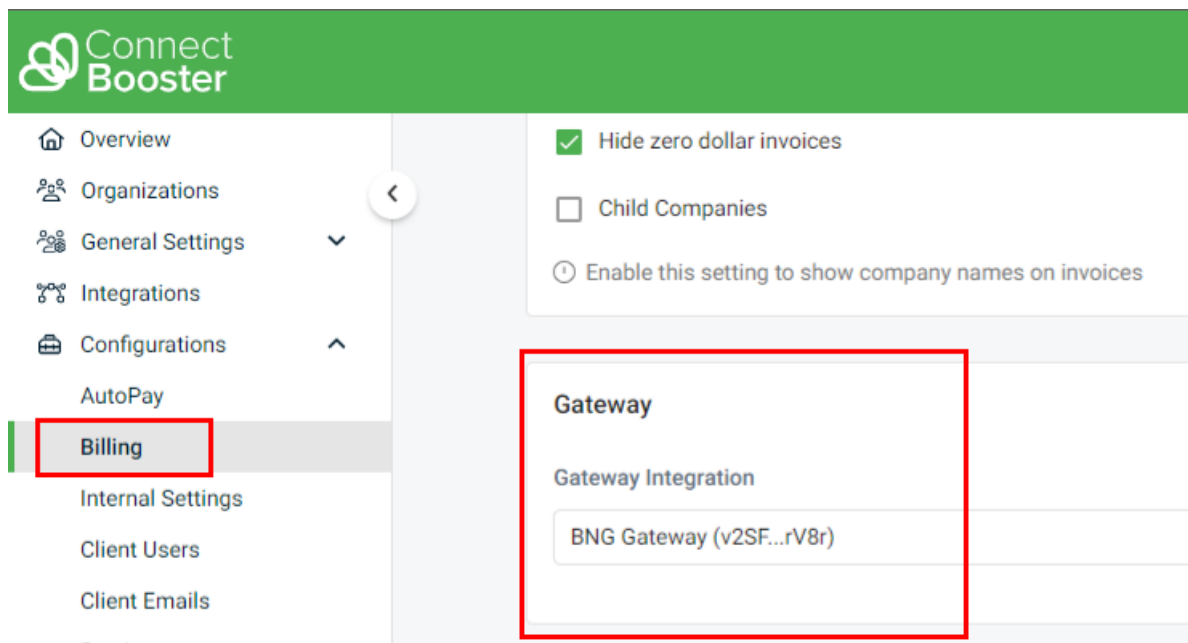

What exactly is a Gateway?

> In a nut shell it's what gives your ConnectBooster portal the ability to take payments.

It's a secure way of transmitting your end clients credit card/bank account data to the financial networks. It aides in the PCI Compliance process, and without a Gateway no credit card payments or E-Check (ACH) payments can take place!

A Gateway is tied to your merchant account.

We have our own BNG Gateway, which aides in expediting the on-boarding process and gives you the best support!

https://www.bnggateway.com/

BNG Gateway Login: secure.bngpaymentgateway.com

The BNG Gateway has functionality to take one-off payments, refunds, and additional reporting tools to help track transactions behind the scenes.
