## What versions of QuickBooks Desktop do we support?

We officially support the software versions that Intuit still maintains and actively governs customer support. This is typically the past 3 years of Pro/Premier/Enterprise releases. While older versions *may continue to work with us*, we can not hold any authority if the integration encounters issues or suddenly fails.

How to find out what version you are running:

1. With QuickBooks Desktop open, press the **F2** key or **Ctrl+1**.
2. In the **Product Information** window, find the **Versions Used on File** section.

If you are running a version of QuickBooks older than three years:

*\*Functionality may continue with older versions of QuickBooks, but we can not guarantee to support nor troubleshoot if function ceases*
