

# New Internal Email Notifications

Last Modified on 08/20/2019 11:36 am CDT

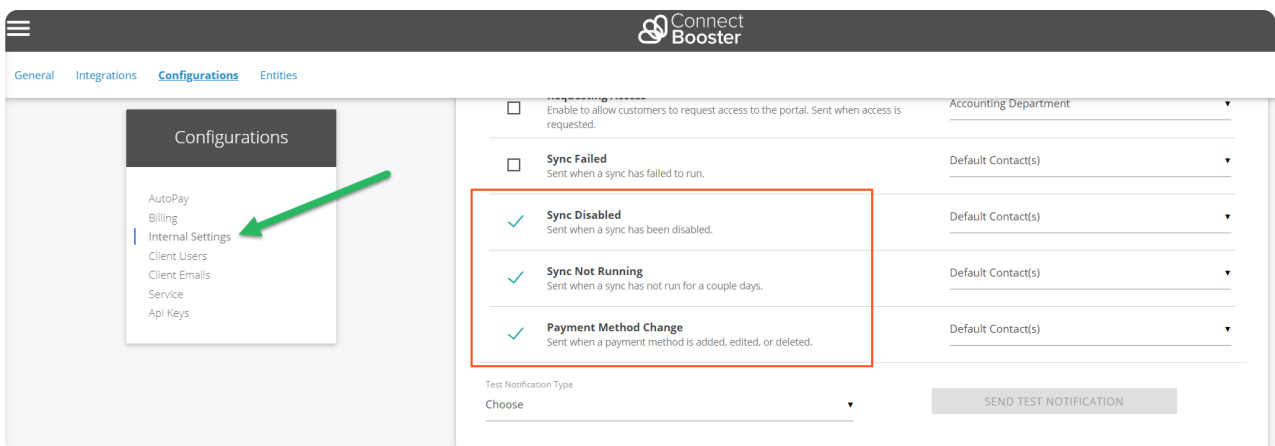

## August 15th, 2019

You asked, we listened! Customers requested a few Quality-of-Life improvements for system notifications (internal facing).

Our update includes three brand new email notifications. The new notifications are:

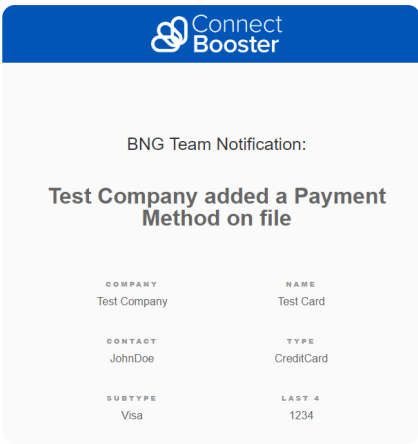

- Payment Method Changed
- Sync Not Running
- Sync Disabled

You can find these under  Settings + Configurations + Internal Settings.

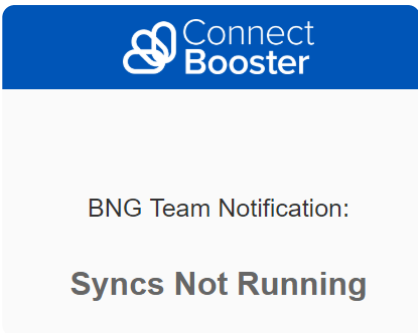

## Payment Method Change

Frequently asked for, this new notification is a great way to inform your team when a client adds, edits, or deletes a credit card or ACH on file!

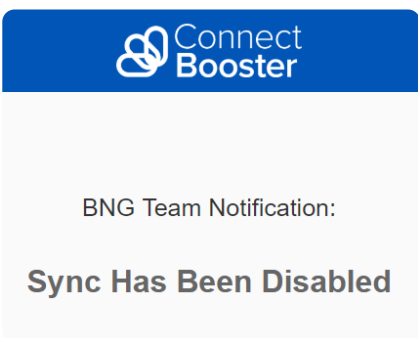

## Sync Not Running

Sends out approximately 48 hours if we notice any of your integration syncs have not run.

## Sync Disabled

Triggered if any of your integrations are set to "disabled".
